## DETAILED ACTION

This action is in response to Applicant's amendment filed on 05/11/2009.

**Independent claims 1, 7, and 12 have been amended by including limitations that uniquely distinguish them from the teachings of the prior art used in the previous office action. New dependent claims 23-24 have also been added.** Claims 1-8, 10-14, and 21-24 are now pending in the present application.

### *Allowable Subject Matter*

**Amended claim 1 is allowable.** The following is a statement of reasons for the indication of allowable subject matter:

Consider **claim 1**. None of the prior art of the record teaches or fairly suggests all of the claimed limitation of the invention. The best prior art found during the examination of the present application, **Watson et al. (U.S. Patent Publication # 7,213,143 B1)** fails to specifically disclose the limitation of "receiving a stream of messages including two independently compressed and multiplexed messages; distinguishing a compressed control message from a compressed user message before decompressing the control message only, and transmitting the user message (payload or data) without decompression". **Dependent claim 2** adds another limitation to claim 1 by specifying that the control message comprises a multiplex identifier, in order to distinguish control messages from user messages, and **dependent claim 5** recites that the user message is without the multiplex identifier.

Since all the features of **claim 1** are not disclosed by any of the best available prior art, either alone or in any combination, the examiner considers **claim 1 to be novel and non-obvious and therefore allowable. Independent claims 7 and 12 disclose similar limitations for an apparatus and a system, and are therefore also allowable. Dependent claims 2-6, 8, 10, 11, 13, 14 and 21-24 are also allowable because of their dependency on the allowable independent claims 1, 7 and 12.**
